No presorting is necessary. Simply choose your settings, place the bills in the hopper and go. The Billcon D551 counts the bills you want to count and automatically diverts the others to the large 100 note-capacity pocket. Everything is performed quickly and accurately with no need to stop midway through the process. The Billcon D-551 features advanced high-speed denomination recognition technology, four modes of counting bills, preset batching and a blazing 1,200 notes per minute speed.

Your Logical Choice When Speed and Accuracy Count Most ! Times have changed...and so have your needs. Saving your staff time and your company money are more important than ever. So that's why Billcon's engineers designed one of the best and fastest Currency Discrimination Counters money can buy. The all-new Billcon D-551 features advanced high-speed denomination recognition technology, four modes of counting bills, preset batching, a big 300-note Hopper, 100-note Pocket, 200-note Stacker, and a blazing 1,200-notes-per-minute speed. Not only do you get this superior speed and performance, the new D-551 also offers you the accuracy, the functionality, the down-to-earth simplicity of operation, and the quality, durability, and after-sales service that comes with every product Billcon makes. This is the exact same machine chosen by commercial banks and financial businesses everywhere.

#### FOUR COUNTING MODES:

- **Mixed Mode** Identifies and counts mixed denomination bills, quickly and accurately.
- **Single Mode** Counts a specific denomination. Different denominations are fed to the pocket.
- **Separation Mode** When a bill of a different denomination is detected, the machine temporarily stops. When bills are removed from the stacker, counting resumes.
- **Free Mode** Counts the number of bills placed in the hopper.

#### Additional Features:

- Handles bills in any condition, even limp or folded notes.
- Offers five preset batches (100, 50, 25, 20, 10), or manually set any other batch between 1 and 999.
- Notifies user of errors with an alarm and LCD readout.
- Provides an auto-start feature to save you time.
- Offers suspicious note detection as counterfeit using magnetic sensors.
- If the machine detects a suspected counterfeit bill while counting , it will stop with the suspected bill being the last bill in the output hopper and will display an error code on the LCD display panel. The operator can then closely inspect the suspected bill and take appropriate action.
